

SELECTED CASE STUDY

RESTAURANT OPERATIONAL RECOVERY

A recovery framework for restaurants where the food is not the core problem - the operating structure behind the food is broken.

STRUCTURE | DISCIPLINE | EXECUTION

PAUL FORCINITI

RESTAURANT OPERATIONAL RECOVERY

CONTEXT

Underperforming restaurants often try to fix performance with new dishes, new promotions, or more staff. The deeper issue is usually operational: unclear leadership, weak prep systems, poor communication, inconsistent standards, and little accountability.

CORE CHALLENGE

- Daily service depends too heavily on individual effort instead of repeatable systems.
- Menu, prep, purchasing, and staffing decisions are not connected to profitability.
- Leadership lacks clear tools to identify issues before they become service failures.

ADVISORY FOCUS

OPERATIONAL DIAGNOSIS

LEADERSHIP STRUCTURE

SERVICE STANDARDS

MENU LOGIC

ACCOUNTABILITY SYSTEMS

EXECUTION DISCIPLINE

STRATEGIC OUTCOME

A practical recovery path that stabilizes the operation, clarifies priorities, and gives leadership a framework for consistent execution and measurable improvement.

THREE PHASES.

One disciplined path from operational diagnosis to implementation-ready systems.

01

DIAGNOSE

Identify where performance is breaking: people, prep, purchasing, workflow, menu structure, or leadership.

02

PRIORITIZE

Separate urgent operational risks from long-term improvement work and define the first control points.

03

REBUILD

Install standards, accountability, reporting habits, and service routines that can hold under pressure.

BUILT INSIDE REAL OPERATIONS

Systems | Structure | Accountability | Performance

OPERATIONAL CLARITY FOR MODERN HOSPITALITY.

WHAT THIS ENGAGEMENT CAN SUPPORT

- Restaurants dealing with inconsistent execution, weak standards, or leadership gaps.
- Owners who need a clear operational diagnosis before investing in more changes.
- Teams that need discipline, structure, and practical systems to regain control.

OPENING OR REFINING A RESTAURANT?

Request a consultation to discuss structure, systems, and execution.
